ATTACKS

Weapon	Hit	Damage	Notes
Greataxe	+7	1d12+4	1-2→3, Cleave, +3 dmg w/ HWM (every Attack-action hit)
Handaxe	+7	1d6+4	Thrown 20/60, Vex
Maul (to buy)	+7	2d6+4	1-2→3, Topple, +3 dmg w/ HWM

Cleave: On hit → free attack vs. adjacent creature (1d12 only, no mod) **Vex:** On hit → Advantage on next attack vs. same target **Topple:** On hit → DC 15 CON save or Prone (attacks within 5 ft have Advantage vs. it) **Heavy Weapon Mastery (GWM):** +3 damage on *every* hit with a Heavy weapon as part of the Attack action (not Hew or reactions; Cleave hit = DM call, RAW ambiguous) **Savage Attacker:** 1/turn, roll damage dice twice, take either

RESOURCES

Rune Stone — Earth's Grasp (next weapon hit) (until I hit) (DC 13 STR save)	○	Long

TURN OPTIONS

Action

- **Attack** → **2 attacks** (Extra Attack); 4 with Action Surge
- **Action Surge** → Take another Action this turn

Bonus Action

- **Second Wind** → Heal 1d10+5 + **move 15 ft, no Opportunity Attacks** (Tactical Shift)
- **Hew (GWM)** → After crit or kill with Heavy weapon, attack again with that weapon
- **Lunging Attack (1 die)** → Dash; move ≥5 ft straight before a melee hit (Attack action) → +1d8 dmg

No Action (anytime, even out of combat)

- **Tactical Mind** → Failed ability check? Expend a Second Wind *use*, add 1d10 (if still fails, use refunded; no Tactical Shift movement)

Reaction

- **Riposte** → Enemy misses you? Attack back +1d8 damage
- **Opportunity Attack** → Enemy leaves your reach
- **Rune Stone (Shield effect)** → +5 AC until start of next turn (vs. attack or Magic Missile)

Free (1/turn each)

- **Cleave** → After Greataxe hit (one more attack 2nd creature, only weapon dmg)
- **Savage Attacker** → Roll damage dice twice, take either (*PHB p. 201*)

(Heavy Weapon Mastery is not 1/turn — it's every Attack-action hit, see Attacks)

MANEUVERS (DC 15, cost 1 Superiority Die, max 1 maneuver per attack) — PHB pp. 93-94

Superiority Dice: ○ ○ ○ ○ (d8, regain all on Short/Long Rest)

Maneuver	Trigger	Effect
Goading	On hit	+1d8 dmg, target has Disadv attacking others (WIS neg)
Lunging	Bonus Action	Dash; move ≥5 ft straight before melee hit (Attack action) → +1d8 dmg
Riposte	Enemy misses	Reaction attack, +1d8 dmg

SKILLS

Skill	Mod		Skill	Mod
Athletics	+7		Stealth	+4 (Disadv)
Intimidation	+2		Survival	+3
Perception	+3		Animal Handling	+3

Passive Perception: 13 · Tools: Gaming set, Brewer's Supplies

Languages: Common + 2 open (standard languages, PHB p. 37 — 🚩 TODO: ask DM if Svilland has its own, e.g. a Norse tongue)

FIGHTING TECHNIQUES

Standard Turn

- **Two greataxe swings** (+7, 1d12+7 each with HWM). Pick a target whose neighbor you also want dead — a hit lets **Cleave** carry into the creature next to it (free 1d12, once/turn)
- **Savage Attacker** on the biggest damage roll of the turn (1/turn)
- Spend a superiority die when it matters: **Goad** (DC 15 WIS) on the enemy you want locked onto you

Opening Moves

- **Out of reach?** Throw a handaxe (+7, 20/60) — a hit triggers **Vex**: Advantage on your next attack vs. that target
- **Need to close fast?** **Lunging Attack** (Bonus Action, 1 die): Dash, come in ≥ 5 ft straight → +1d8 on a melee hit this turn

Nova Turn (*the decisive round — boss revealed, ally down, breach to hold*)

1. **Prime Earth's Grasp beforehand** (1/long rest): your first hit forces DC 13 STR save → target **Restrained** — your remaining attacks *and the whole party's* get Advantage, its attacks have Disadvantage
2. Attack (2 swings) → **Action Surge** → Attack again = $4 \times (1d12+7)$
3. Maneuver die on key hits (max 1 per attack)
4. Any kill or crit → **Hew** (Bonus Action): 5th swing

Your One Reaction — spend it wisely

1. **Rune Stone Shield** (1/short rest) — a big attack is about to hit by ≤ 5 ? AC 16 → 21, likely turning it into a miss. Auto-negates *Magic Missile*
2. **Riposte** (1 die) — melee enemy missed you? Punish: +7, 1d12+4+1d8
3. **Opportunity Attack** — enemy leaves your reach

Staying Alive

- **Second Wind** (Bonus Action, 3/rest): heal 1d10+5 **and** shift 15 ft with no Opportunity Attacks — heal-and-reposition, or escape a surround
- Playing tank: **Goad** the biggest hitter — Disadvantage on attacks against anyone but you, and you have AC 16 + the Shield stone
- **Heroic Inspiration**: hold it to re-roll a failed save or a just-missed key attack (you re-roll *after* seeing the result)

Resource Pacing

- **Superiority dice (4)**: refresh on *short* rest — spend 1-2 per fight, don't hoard
- **Action Surge (1/rest)**: for the decisive round, not round one by habit
- **Rune Stone**: Shield freely (short rest); **Earth's Grasp only once per day** — save it for the fight that matters

BATTLE SCENARIOS

Which weapon? Two or more enemies side by side → **Greataxe** (Cleave). One big target → **Maul** (Topple). Average per hit with GWF + HWM: greataxe ≈ 13.75, maul ≈ 15.

Swapping mid-turn: each attack lets you equip **or** unequip one weapon (PHB p. 361). Swing the greataxe, drop it, draw the maul before swing 2.

1. The Big Brute — one tough enemy (ogre, troll, boss)

- **Weapon: Maul.** Swing 1 → **Topple** (DC 15 CON). If it falls Prone, your swings from within 5 ft have **Advantage**, and so do your melee allies' attacks. Its own attack rolls have Disadvantage (PHB p. 372)
- **Decisive fight?** Use **Action Surge** *after* it's down, for more swings with Advantage
- **Lock-down combo:** Earth's Grasp (can't move, Restrained) + Topple. A Prone creature with Speed 0 can't stand up (PHB p. 372). *Earth's Grasp exact duration = DM call*
- Once it's Prone, spend dice on **Goad**ing. It has Disadvantage attacking anyone but you, and it's already attacking at Disadvantage while Prone
- ⚠ Warn the archers: ranged attacks against a Prone target have **Disadvantage**

2. The Mob — many weaker enemies

- **Weapon: Greataxe.** Step in where two enemies stand next to each other. Your first hit each turn → **Cleave** into the neighbor (1d12, 1/turn)
- Aim at the wounded: a kill triggers **Hew** (Bonus Action), which is a 3rd swing
- **Savage Attacker** on the hit that's close to a kill, to secure it and the Hew
- Don't spend Superiority Dice on minions. Save them for **Riposte** against the ones that miss you
- Surrounded and hurting? **Second Wind** heals 1d10+5 and moves you 15 ft without Opportunity Attacks

3. Bodyguard — protect a fragile ally / hold a doorway

- **Weapon: Maul** (Greataxe if they come in packs). Stand in the chokepoint between the enemies and your ally
- **Goad**ing on the biggest hitter: Disadvantage on its attacks against anyone but you (WIS save)
- **Opportunity Attack with the maul** as they slip past. Topple works on *any* hit with it, so a Prone target can only crawl or spend half its Speed standing up
- A big hit about to land on you by ≤5? **Rune Stone Shield** (+5 AC)
- (*Sentinel at L8 makes this your specialty*)

4. Archers & Casters — enemies at range

- **Close fast: Lunging Attack** (Bonus Action, 1 die) = Dash (60 ft total), then Attack. Move ≥5 ft straight right before the hit for +1d8
- **Can't reach?** Throw a handaxe (20/60). A hit gives **Vex**: Advantage on your next attack against it
- **Casters:** Rune Stone Shield blocks *Magic Missile*. **Earth's Grasp** → Restrained: its attack rolls have Disadvantage, and so do its DEX saves (PHB p. 373). **Topple** also puts its attack rolls at Disadvantage

5. Emergency — you're dropping fast

- **Second Wind** first (Bonus Action): +1d10+5 HP **and** 15 ft away without Opportunity Attacks, to get out of a surround
- **Rune Stone Shield** on the next hit that lands by ≤5
- **Heroic Inspiration** to re-roll a failed save. WIS saves (+0) are your weak spot against fear and charm
- Turn it around: an enemy you've Toppled or Restrained attacks at Disadvantage
